

DESIGNED BY ELECTRICIANS. BUILT BY CONTACTUM.

New 6 terminal box with one extra-large terminal to comfortably take all the earth cables.

Extra-strong terminals to hold multi-cable jobs.

Big wiring capacity for convenience.

Selective entry for easier installation.

Quick and easy to install with a power tool. Backing plate is made of flexible thermoplastic that complies to ceiling contours and withstands over-tightening.

Fastest ceiling rose to wire. Simply slot in the cables and tighten – screws are already backed-off to save time. A large earth terminal takes all the earths, again with backed-off screw.
